

## **Company profile**

Aerodrome is a world leading, pioneering UAS state-of-the-art airpower management solutions company, encompassing the expertise & know-how to provide our customers with the most efficient, cost-saving, full range of services for the Training, Operation and Maintenance of UAS platforms and fleets. In addition, the company provides its customers with engineering documentation, technical writing, and training development services. The company is a publicly held company, founded by former members of the Israeli Air Force UAS elite units. Equipped with a full range UAS accumulated knowledge, operational skills, and battle-proven experience, we manifest an entire UAS operation envelope of Training and Maintenance - establishing a disruptive and unique aerial academy center for governments and manufacturers worldwide. Aerodrome operates in Israel alongside dozens of countries worldwide, employing over 120 highly trained and experienced employees.
